Hazardous Weather

Hazardous Weather

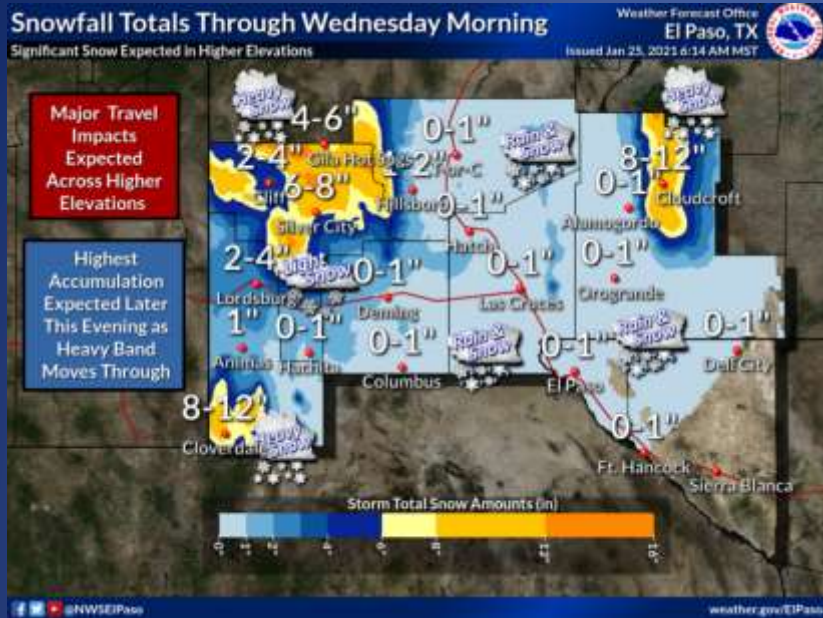

Light snowfall accumulations are expected across the Panhandles Tuesday through Tuesday night. Some snowfall could linger into the Wednesday morning commute.

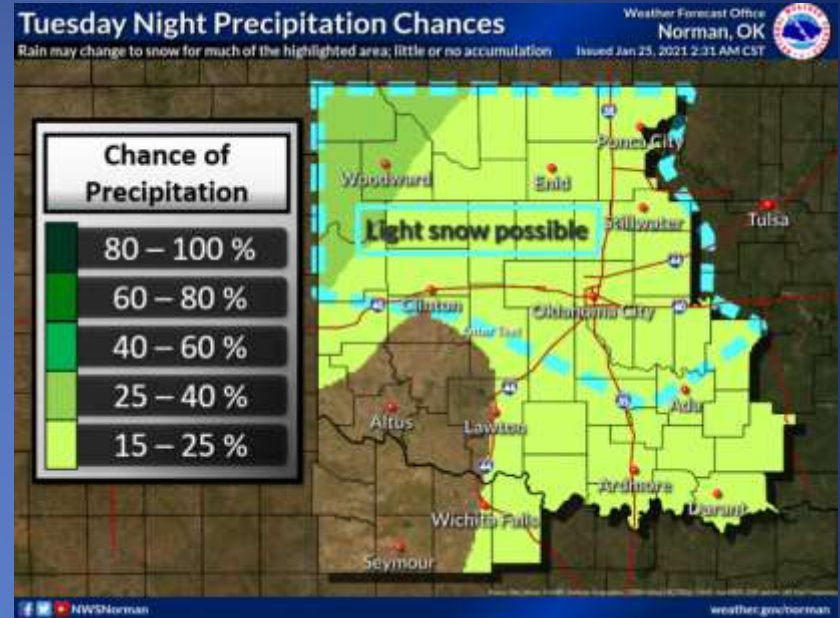

A High Wind Warning and Wind Advisory is in effect until 5PM CST/4 PM MST.

Hazardous Weather

A winter storm system will move through the Borderland today into Tuesday. Significant snowfall is expected in the higher elevations of the Gila region, Sacramento Mountains, and southwestern corner of the NM Bootheel. Travel will become very hazardous in these areas as roads become snow covered and perhaps even impassable. Avoid travel if possible. Western lowlands could see a few inches of snow, with a rain/snow mix likely elsewhere with little to no accumulation. Precipitation will come to an end Tuesday night.

Our next round of precipitation will be Tuesday night. It will be light, but temperatures will probably be cold enough for mostly snow across much of the area. Little or no accumulation is expected.

Hazardous Weather

A High Wind Warning and Wind Advisory is in effect until 5PM CST/4 PM MST.

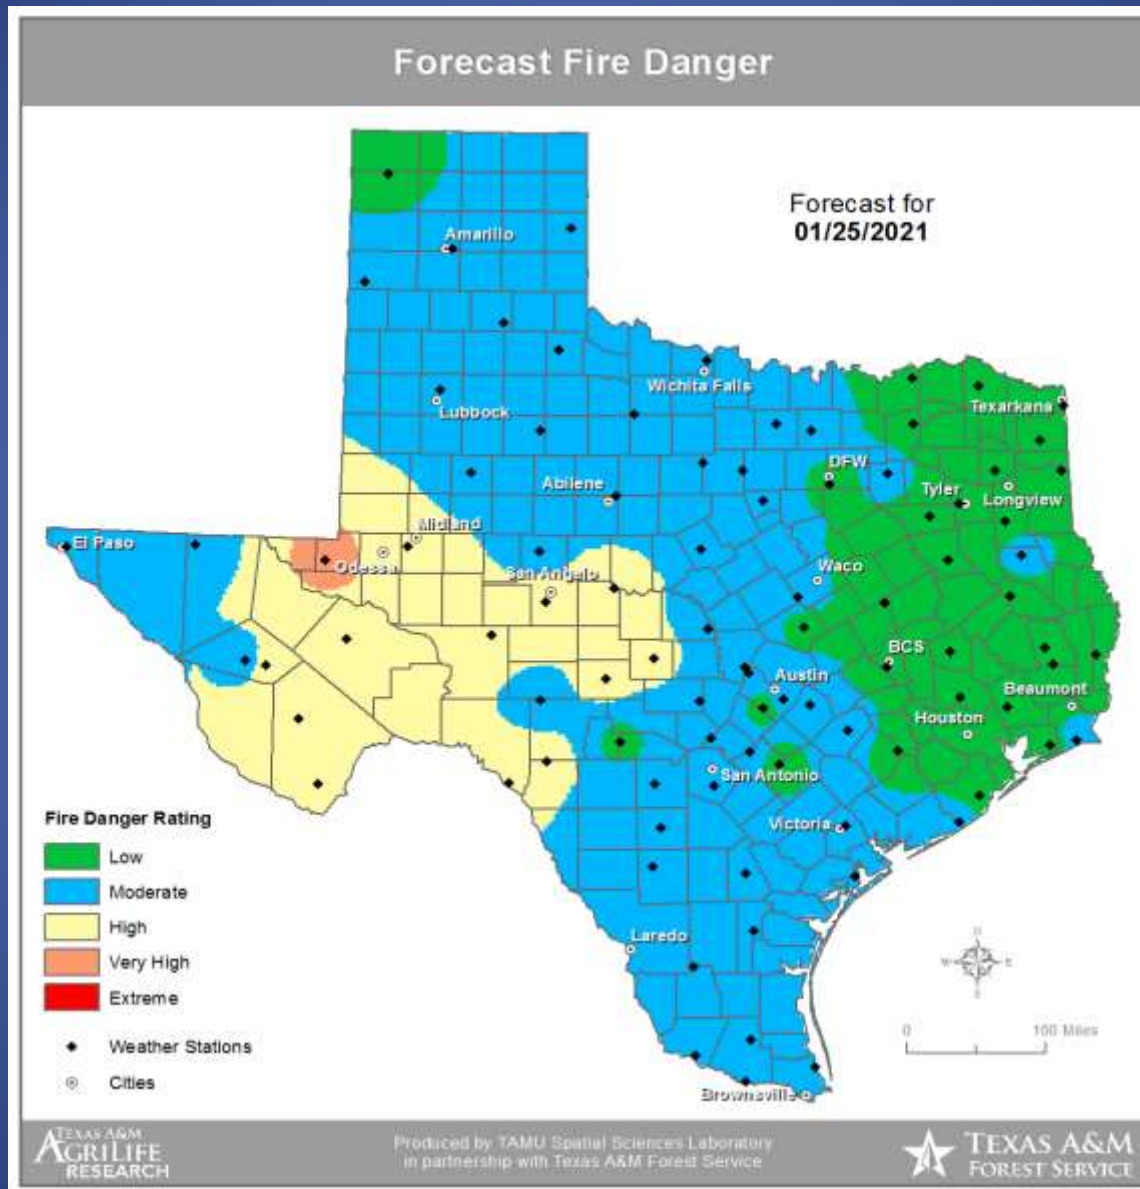

A marginal risk for severe thunderstorms is shown for us in the dark green area as a line of thunderstorms will move across the four state area this morning and then weaken this afternoon. Any of the stronger storms could possibly produce hail or gusty winds along with brief heavy rainfall.

Weather Warnings/Advisories Issued

DATE	WARNING TYPE	LOCATION
01/24/21	Winter Weather Advisory	Dallam, Hansford, Hartley Lipscomb, Ochiltree & Sherman Counties
